

THE FIRST DAY ON THE SOMME 1 JULY 1916

The first day on the Somme, 1 July 1916 The first day of the Battle of the Somme, which commenced on July 1, 1916, stands as one of the most infamous and devastating days in military history. It marked the beginning of a brutal, protracted conflict on the Western Front during World War I, characterized by enormous loss of life, tactical misjudgments, and a grim reflection of the horrors of modern warfare. This day not only epitomized the brutal realities of trench warfare but also signaled a pivotal moment in the evolution of military strategy, public perception, and the human cost of war.

Background to the Battle of the Somme

The context of the Western Front in 1916

By 1916, the Western Front had become a static, grueling stalemate. Both the Allies and the Germans had entrenched themselves deeply into a network of trenches spanning

hundreds of miles. The war had devolved into a war of attrition, with neither side gaining significant ground despite massive casualties. The Allied command was eager to break the deadlock, and the Battle of Verdun and the Battle of the Somme were part of a strategic effort to divert German attention and forces from Verdun, as well as to achieve a decisive breakthrough.

The planning and objectives of the Somme offensive

The Battle of the Somme was conceived as a joint French and British effort, with the primary goal of relieving pressure on Verdun and breaking through German lines. The plan involved a massive artillery bombardment intended to destroy German defenses, followed by an infantry assault. The initial objectives included:

1. Breaking the German defenses along a 15-mile front
2. Achieving a breakthrough that would enable rapid advances into enemy territory
3. Demonstrating Allied strength and morale

The offensive was also aimed at testing new tactics and equipment, including tanks, which were still in their infancy at this stage.

The events of July 1, 1916

The scale of the attack

On the morning of July 1, approximately 120,000 British soldiers, supported by around 20,000 French troops on the southern sector, launched their attack. The scale was unprecedented, involving:

1. One of the largest coordinated military assaults in history up to that point
2. Over 57,000 British casualties on the first day alone, including approximately 19,000 killed
3. Aiming to advance only a few hundred yards in many sectors, often less

The sheer scale of the assault and the intensity of the bombardment were meant to obliterate German defenses, but in reality, the German defenses were often still intact, and the artillery barrage failed to achieve its intended effectiveness.

The nature of the fighting

The attack involved soldiers emerging from trenches into a landscape riddled with barbed wire, craters, and machine-gun nests. Key features of the fighting included:

1. Massive machine-gun fire decimating exposed troops
2. Limited visibility due to smoke, dust, and the chaos of battle
3. Insufficient preparation and underestimation of German defenses
4. Use of new tactics, such as creeping barrages, but often poorly coordinated

Many soldiers faced a death trap upon leaving their trenches, with the bombardment often failing to clear German defenses effectively.

The human cost

The casualties on the first day were staggering and shocked the world. Some key figures inc
