The Origins of Botanical Language Historical Roots and Evolution The language of botany has a storied history that dates back centuries. Latin and Greek roots form the backbone of most botanical nomenclature, a tradition established to promote clarity and universality among scientists worldwide. Linnaeus, the Swedish botanist of the 18th century, revolutionized plant classification with his binomial nomenclature, assigning each species a genus and species name in Latin. Over time, as exploration expanded and new species were discovered, the vocabulary of botany grew exponentially.
