This method requires access to the vehicle's programming port or specific system functions.

1. **Enter Programming Mode:** Turn the ignition key to the "On" position (without starting the engine). Then, press and hold the vehicle's programming or valet switch (often located under the dashboard) until the system enters programming mode. Alternatively, some systems enter programming when turning the ignition on and off several times within a specified sequence.
2. **Initiate Remote Programming:** Within a few seconds, press and hold the "Lock" button on the remote for about 5 seconds. The system should respond with a series of beeps or flashes indicating it has detected the remote.
3. **Confirm Programming:** Release the "Lock" button. The system may beep or flash again to confirm that the remote has been successfully programmed.
4. **Repeat for Additional Remotes:** If programming multiple remotes, repeat steps 2-4 for each additional remote within a specified time window (usually 10-15 seconds).

5. **Exit Programming Mode:** Turn the ignition OFF to exit programming mode. The system should confirm with a final beep or flash.

Note: Some vehicles and systems require a different sequence, such as pressing the "Valet" switch multiple times or using a dedicated programming button. Always refer to your specific vehicle's manual or Viper system manual.

Method 2: Programming by Using the Viper System's Remote Programming Button

Some Viper systems feature a dedicated programming button. Here's how to use it:

1. Locate the programming button on the Viper alarm module (consult your manual for exact location).
2. Press and hold the programming button until the system responds with a beep or flash.
3. While holding the button, press the "Lock" button on your remote.
4. Release both buttons. The system should confirm successful programming.
5. Repeat for additional remotes, then turn the ignition OFF to exit programming mode.

Programming a New Remote Without Existing Programmed Remotes

If you are adding a new remote and no remotes are currently programmed, the process might differ slightly.

Procedure for a Fresh Setup

1. Ensure the vehicle is parked with the ignition off.
2. Enter the programming mode as described above (via ignition cycles or using the system's programming button).
3. Press and hold the "Lock" button on the new remote for 5 seconds.
4. The system should respond with beeps or flashes indicating successful pairing.
5. Repeat for additional remotes as needed.
6. Turn the ignition off to complete the process.

Tip: Some systems require the remote to be within close proximity to the vehicle's antenna for successful programming.
