What Is the Rotter Incomplete Sentence Blank Test?

The Rotter Incomplete Sentence Blank (RISB) is a projective psychological assessment designed to explore an individual's

subconscious thoughts, feelings, and attitudes. It consists of a series of incomplete sentences that respondents are asked to complete, revealing underlying psychological processes. Developed by Julian B. Rotter, the test is widely used in clinical, counseling, and research settings. The RISB typically features 40 incomplete sentences, each requiring the respondent to finish the thought in a way that reflects their current emotional state, personality traits, or life experiences. The responses are then analyzed to identify themes, patterns, and potential areas of concern.
