The scope of these themes reflects the complex, interconnected nature of the modern global system, emphasizing the importance of multidisciplinary analysis.

Theoretical Frameworks in International Political Economy

The paperback delves deeply into various theoretical perspectives that explain how global power and wealth are distributed and contested.

Classical Theories

- Mercantilism: Emphasizes state power and economic nationalism, viewing wealth accumulation as a zero-sum game. - Liberalism: Advocates for free markets, international trade, and cooperation, asserting that economic interdependence promotes peace and prosperity. - Marxist Approaches: Focus on class relations, imperialism, and the exploitation inherent in capitalist systems, highlighting structural inequalities.

These frameworks are critically examined within the book, illustrating their explanatory strengths and limitations in analyzing current global power dynamics.
