Understanding Accounting Changes

Types of Accounting Changes

Accounting changes refer to modifications in accounting policies, estimates, or the correction of prior period errors. These changes are crucial because they impact how financial

1. **Change in Accounting Policy:** This involves switching from one generally accepted accounting principle (GAAP) to another, such as adopting new revenue recognition standards.
2. **Change in Accounting Estimate:** Adjustments based on new information or developments, like revising depreciation methods or useful lives of assets.
3. **Correction of Prior Period Errors:** Rectifying mistakes made in previous financial statements, often due to oversight or misapplication of accounting standards.

Accounting Standards Governing Changes

Accounting standards provide guidance on how to account for these changes:

1. **GAAP (Generally Accepted Accounting Principles):** US standards require retrospective application for certain changes and errors, meaning prior period financial statements are restated.
2. **IFRS (International Financial Reporting Standards):** Similar principles apply, emphasizing consistency and comparability, with specific guidance on when to apply retrospective or prospective adjustments.
