Protective Gear

- Helmet: Always wear a properly fitted helmet to protect your head. - Wrist Guards: Help prevent wrist injuries during falls. - Knee and Elbow Pads: Cushion impacts and prevent abrasions. - Proper Clothing: Wear comfortable, breathable clothes and closed-toe shoes.

Additional Accessories

- Reflective gear for visibility - A small backpack for water and essentials - A skate tool for maintenance

Preparing to Skate

Getting ready involves more than just putting on skates. Proper preparation sets the foundation for a safe and enjoyable learning experience.

Standing and Balancing

Begin by standing on your skates on a flat surface: - Keep your feet shoulder-width apart. - Slightly bend your knees to lower your center of gravity. - Maintain your weight evenly distributed on both skates. - Use your arms for balance, keeping them slightly out to the sides. Practice balancing until you feel stable for at least 30 seconds, then increase your duration.

Stopping Techniques

The most common beginner stopping method is the heel brake: - Keep your dominant foot in front. - Gently press down on the brake with your heel to slow down. - Practice stopping on a gentle incline and flat surface. Alternative stopping methods include: - T-Stop: crossing one skate behind the other to slow down. - Power Stop: a quick, controlled plow to reduce speed.

Turning and Maneuvering

- Use your shoulders and hips to guide your direction. - Practice gentle turns by leaning slightly in the desired direction. - For sharper turns, shift your weight onto the inside edge of the skate.
