Origins and Context of the Expedition

Historical Background

The early 1800s marked a period of intense territorial expansion and exploration in North America. Following the Louisiana Purchase in 1803, the United States acquired approximately 828,000 square miles of territory from France, doubling the size of the nation overnight. This acquisition sparked a desire among American leaders to explore and map the vast western lands, establish trade routes, and assert sovereignty over the newly acquired territories. President Thomas Jefferson was particularly eager to explore these uncharted regions. He commissioned the expedition, recognizing the potential scientific, geographic, and economic benefits of such an undertaking. The mission aimed to find a practical route across the western part of the continent to facilitate commerce, establish American presence, and gather scientific data about flora, fauna, and geography.

Choosing the Team

Jefferson appointed Meriwether Lewis, a former army captain and Jefferson's private secretary, to lead the expedition. Lewis selected William Clark, a seasoned frontiersman and army officer, to serve as co-leader. The team comprised approximately 45 men, including soldiers, fur trappers, interpreters, and scientists. The core objectives of the expedition were:

- To explore and map the Missouri River and its tributaries
- To find a practical route to the Pacific Ocean
- To establish American sovereignty in the west
- To gather scientific and geographic knowledge
- To establish good relations with Native American tribes

The Louisiana Purchase and the Drive for Exploration

The Lewis and Clark expedition was born out of a pivotal moment in American history—the Louisiana Purchase of 1803. The United States, under President Thomas Jefferson, acquired approximately 828,000 square miles of territory from France, effectively doubling the nation's size. This vast expanse opened new frontiers filled with unknown lands, waterways, and potential for expansion. Jefferson, a visionary leader with an interest in science, geography, and the pursuit of knowledge, saw exploration as a means to understand these new territories.
