

ECOCRITICISM OF THE GLOBAL SOUTH

ecocriticism of the global south is a vital and emerging field within environmental literary studies that examines how literature, culture, and ecological issues intersect in regions traditionally marginalized in global discourses. Rooted in the broader discipline of ecocriticism, which analyzes the representation of nature and environmental concerns in literature, the ecocriticism of the global south emphasizes the unique socio-economic, political, and cultural contexts that shape environmental narratives and practices in Latin America, Africa, Asia, and other developing regions. This approach seeks to challenge dominant narratives centered on the Global North, highlighting issues of environmental justice, indigenous knowledge, postcolonial perspectives, and the impacts of globalization on ecological systems and communities.

Understanding Ecocriticism and Its Focus on the Global South

What Is Ecocriticism?

Ecocriticism is an interdisciplinary field that explores the relationship between literature and the environment. It

examines how texts depict nature, environmental crises, human-nature interactions, and ecological ethics. Ecocriticism aims to raise awareness about environmental issues and promote sustainable attitudes through literary analysis.

The Significance of Focusing on the Global South

While ecocriticism initially gained traction in Western literary studies, its expansion into the global south reveals critical insights into the ways environmental issues are experienced and narrated outside Western contexts. Focusing on the global south allows scholars to:

- Address environmental injustices faced by marginalized communities
- Highlight indigenous and local ecological knowledge
- Challenge colonial and neocolonial narratives about development and nature
- Explore the impacts of climate change, resource extraction, and urbanization on vulnerable populations

Understanding Ecocriticism of the Global South

Definition and Scope

Ecocriticism of the Global South refers to the study and critique of environmental representations, practices, and policies within countries traditionally categorized as part of the Global South—regions characterized by their colonial histories, developmental challenges, and rich biodiversity. Unlike Western ecocriticism, which often centers on issues of industrialization, consumerism, and nature writing, ecocriticism of the Global South prioritizes themes such as colonial legacies, environmental justice, indigenous rights, and resistance to extractivism. This field interrogates how literature, media, and cultural narratives in these regions depict nature, human-environment relations, and socio-political struggles. It also critically examines the ways in which global environmental discourses intersect with local realities, often revealing power imbalances, marginalization, and resistance.

Historical Context and Development

The emergence of ecocriticism of the Global South is rooted in broader postcolonial and decolonial theories that critique Western dominance over knowledge and ecological practices. It gained momentum in the early 21st century as scholars recognized that environmental issues cannot be fully understood without considering historical legacies of colonialism, economic exploitation, and cultural marginalization. Key milestones include: - The recognition of indigenous ecological knowledge systems as valuable and legitimate. - The focus on environmental injustices faced by

marginalized communities. - The integration of literary and cultural studies with environmental activism. This field is characterized by its interdisciplinarity, drawing from postcolonial studies, anthropology, environmental history, and literary criticism.
