However, these sales often provoke diplomatic responses from China, which views Taiwan as a renegade province and strongly opposes foreign military support. CRS reports highlight

that this tension influences the scope and timing of arms sales, with administrations weighing strategic benefits against diplomatic repercussions.

Controversies and Challenges

While US arms sales to Taiwan aim to bolster its defense, they are not without controversies: - Congressional debates: Some members question the scale and nature of sales, citing risks of escalation. - China's opposition: Repeated protests and military exercises aimed at Taiwan in response to arms sales. - Operational challenges: Ensuring that Taiwan can effectively integrate and maintain advanced systems remains a logistical challenge. CRS reports also note that the Biden administration has continued to approve sales initiated under previous administrations, signaling a bipartisan consensus on supporting Taiwan's defense.

Future Outlook and Continuing Trends

Based on the CRS reports, several trends are evident for the future of US arms sales to Taiwan: - Increased modernization efforts: Upgrading existing systems and acquiring new advanced weapons. - Focus on asymmetric capabilities: Enhancing Taiwan's ability to counteract larger Chinese forces through missile defense, cyber

capabilities, and stealth technology. - Potential for new technologies: Exploration of emerging systems such as next-generation fighter aircraft, drone warfare, and electronic warfare systems. Digital access also encourages experimentation. Readers are more willing to explore unfamiliar subjects when the cost and effort of access are low. This openness supports interdisciplinary learning, where ideas from different fields connect in unexpected ways.

For long-term learners, downloadable books provide continuity. Notes remain saved, highlights preserved, and bookmarks intact across devices. This persistence supports ongoing projects and evolving interests, allowing readers to build knowledge progressively rather than starting from scratch each time.
