Its primary goal is to produce accurate financial statements that reflect the company's financial position and performance over a given period. These statements are used by a variety of stakeholders, including investors, creditors, management, and regulatory agencies.

Core Principles of Financial Accounting

2. **Consistency Principle:** Accounting methods should be applied consistently across periods.
3. **Going Concern Principle:** Assumes the business will continue to operate unless there is evidence to the contrary.
4. **Materiality:** Only significant information that could influence decision-making needs to be disclosed.
