1. Auditing involves an independent examination of an organization's financial statements to ensure they present a true and fair view of the company's financial position. The outcome is an audit report that provides assurance to stakeholders about the accuracy of the financial data.
1. Assurance services encompass a broader range of activities designed to improve the quality and reliability of information, which can include non-financial data such as sustainability reports, compliance assessments, and internal controls.

Why are these services essential?

They serve to reduce information asymmetry, mitigate risks, and bolster stakeholder confidence. For investors, regulators, and customers alike, trustworthy information forms the foundation for informed decision-making.
