Assessing the Severity and Urgency

Knowing when to seek immediate medical care can be life-saving. Consider the following warning signs:

Red Flags for Urgent Medical Attention

- Sudden onset of the worst headache of your life ("thunderclap headache") - Headache accompanied by neurological symptoms: weakness, numbness, vision changes, difficulty speaking - Headache following head trauma or injury - Sudden facial weakness or paralysis - High fever with neck stiffness (possible meningitis) - Headache with altered mental status, confusion, or loss of consciousness - Visual disturbances such as double vision or sudden vision loss - Unexplained weight loss, night sweats, or systemic symptoms with facial pain If any of these symptoms are present, seek emergency medical care immediately.

Initial Steps to Take When Experiencing Headache or Facial Pain

For less severe symptoms, a structured approach can help manage your condition effectively.
