Pedagogical Foundations and Alignment with CEFR

Test 3 Face2Face B1 to B2 is rooted in the principles of communicative language teaching (CLT), prioritizing functional language use over rote memorization. Its tasks are designed to reflect authentic language use, encouraging learners to demonstrate their ability to operate effectively in real-life situations.

CEFR Alignment The test's scoring and proficiency descriptors are explicitly aligned with CEFR levels B1 and B2, with clear benchmarks such as:

- B1: Can understand the main points of clear standard input on familiar matters, deal with most situations while traveling, produce simple connected text.
- B2: Can understand the main ideas of complex texts, communicate with a degree of fluency, produce detailed texts on a wide range of subjects, and interact with native speakers with relative ease.

By aligning with these descriptors, Test 3 Face2Face B1 to B2 offers a nuanced assessment of learners' progression toward upper-intermediate competence.

Task Authenticity and Real-Life Relevance The assessment emphasizes tasks that mirror real-world

communicative demands. For example, writing an email to a hotel or discussing options in a collaborative task not only tests language but also encourages practical language application.

Validity and Reliability of the Test

Validity The test's content validity is supported by its foundation on CEFR descriptors and its inclusion of tasks that reflect real-life language use. Its construct validity is reinforced through careful task design aimed at measuring specific language skills and competencies. **Reliability** Reliability refers to the consistency of test results over time and across different test administrations. Test 3 Face2Face B1 to B2 employs standardized scoring rubrics, especially for speaking and writing, which enhance inter-rater reliability. Additionally, the use of multiple-choice and objective tasks in listening and reading sections minimizes scorer bias. However, as with all assessments involving human judgment, examiner training and calibration are essential to maintain consistency, particularly in subjective areas like oral and written production. **Psychometric Data** While specific psychometric data (e.g., Cronbach's alpha, item analysis) may vary across testing centers, studies and user reports indicate that the Face2Face

series maintains a high standard of reliability, making it suitable for high-stakes certification and formative assessment alike.
