Practical Examples and Exercises on Page 366

To illustrate, here are typical exercises that might appear on or relate to page 366:

Example 1: Using Ratio Tables

Problem: A recipe calls for 3 cups of flour for every 2 cups of sugar. How much flour is needed if you use 8 cups of sugar?

Solution Strategy:

1. Set up a ratio table:

| Cups of Sugar | 2 | 8 |

||||

| Cups of Flour | 3 | ? |

1. Find the scale factor: $8 \div 2 = 4$.
2. Multiply the flour amount by 4: $3 \times 4 = 12$.

Answer: You need 12 cups of flour.

Example 2: Double Number Line Representation

Problem: Two friends are sharing a bag of candies. Friend A has 5 candies for every 3 candies Friend B has. If Friend A has 15 candies, how many candies does Friend B have?

Solution:

1. Set up a double number line with the ratio:

| Friend A | 5 | 15 |

||||

| Friend B | 3 | ? |

1. Determine the scale factor: $15 \div 5 = 3$.
2. Multiply Friend B's candies by 3: $3 \times 3 = 9$.

Answer: Friend B has 9 candies.

Quality of Free eBooks

Many readers are interested in accessing free eBooks, and fortunately, there are numerous reputable sources that offer high-quality content at no cost. However, not all free eBooks are created equal. The quality of formatting, proofreading, and readability can vary significantly depending on the source. Legal and safety considerations

When downloading free eBooks, it is essential to ensure that the source is legal and safe. Not all devices support advanced multimedia features, so compatibility should be checked before purchasing or downloading. Additionally, interactive content may consume more storage space and battery power compared to standard eBooks.
