Transitioning to a more localized economic model not only reduces environmental impact but also strengthens community bonds, supports small businesses, and promotes a more equitable distribution of resources. This article explores the concept of "local is our future" as a foundational step towards an "economics of happ"—an economic paradigm centered on happiness, sustainability, and social well-being.

Understanding the Shift: From Globalization to Localization

The Limitations of Globalization

Globalization has historically driven economic growth by expanding markets, optimizing supply chains, and enabling the rapid exchange of goods and ideas. However, it has also led to significant

drawbacks: - Environmental degradation due to long-distance transportation - Vulnerability of global supply chains to disruptions - Economic inequalities between regions - Loss of local cultures and traditions
