Detailed Solutions to the 2013 Assignment

Providing detailed answers to the assignment questions is crucial for understanding the core concepts thoroughly. Here, we break down typical questions from the 2013 assignment and offer comprehensive solutions.

Question 1: Explain the Different Types of Open Source Licenses

Answer: Open source licenses define the terms under which software can be used, modified, and distributed. The main types include:

1. **Permissive Licenses:** These licenses, such as MIT and Apache, allow users to modify and distribute software with minimal restrictions. They typically require attribution but do not impose copyleft provisions.
2. **Copyleft Licenses:** Examples include GPL and LGPL.

These licenses require that derivative works also be distributed under the same license, ensuring that the software remains open source.

3. **Proprietary Licenses:** These restrict the use, modification, and distribution of the software, often used in commercial products.

Key Points: - Understand the implications of each license type.
- Recognize the importance of choosing the right license for project goals.

Question 2: Describe the Workflow of Using Git for Version Control

Answer: Git is a distributed version control system widely used in open source projects. The typical workflow involves:

1. **Cloning the Repository:** Download the existing project to your local machine using ``git clone``.
2. **Creating a Branch:** Develop new features or fix bugs in a separate branch with ``git branch`` and ``git checkout``.
3. **Making Changes:** Edit files as needed, then stage them with ``git add``.
4. **Committing Changes:** Save your changes locally using ``git commit`` with descriptive messages.
5. **Pulling Updates:** Sync with the main repository using ``git pull`` to incorporate others' changes.
6. **Pushing Changes:** Upload your commits to the remote repository with ``git push``.
7. **Creating Pull Requests:** Submit your changes for review and merging into the main project.

Best Practices: - Regularly sync with the main repository. - Write clear commit messages. - Use branches for feature development.
