## **What is PDMS?**

PDMS (Plant Design Management System) is a comprehensive 3D CAD software platform developed by Aveva (formerly Intergraph). It is tailored for plant design, allowing users to develop detailed models of industrial plants, including piping, equipment, structures, and instrumentation.

## **Supported File Formats for Import**

PDMS supports various file formats for import, including: - IGES (.igs, .iges) - STEP (.step, .stp) - DXF (.dxf) - DWG (.dwg) - STL (.stl) - Native PDMS formats (for direct import)

However, the most commonly used formats for importing external 3D models are IGES and STEP due to their widespread compatibility and ability to preserve complex geometries.

## **Compatibility Considerations**

- Ensure your external CAD software can export models in IGES or STEP format. - Verify that the exported models are clean, with no unnecessary data or errors. - Be aware of

model scale and units to prevent discrepancies during import.

## **Preparing Your 3D Model for Import into PDMS**

Proper preparation of your external 3D model is vital to ensure a smooth import process.

### **Cleaning and Simplifying the Model**

- Remove unnecessary details, layers, or components that are irrelevant to the plant design. - Simplify complex geometries that may cause import errors. - Check for and fix any gaps, overlaps, or errors in the model.

### **Export Settings and Best Practices**

- Use the correct units (meters, millimeters) matching your PDMS project settings. - Select IGES or STEP formats for export. - Maintain model scale and coordinate system consistency. - Save the file with a clear, descriptive name for easy identification.

### **Tools and Plugins for Export**

Depending on your CAD software, utilize built-in export options or plugins to ensure compatibility: - AutoCAD: Use the EXPORT command with IGES or STEP options. - SolidWorks: Use the Save As feature to export IGES or STEP files. - Other CAD software: Refer to specific export procedures for your

platform.

## **Importing 3D Models into PDMS: Step-by-Step Process**

Once your model is prepared, follow these steps to import it into PDMS effectively.

### **Step 1: Launch PDMS and Set Up Your Environment**
