Section 1 Questions and Answers

Below are typical questions you may encounter in the

assessment, along with detailed explanations and answers.

Question 1: What is the scientific method?

Answer: The scientific method is a systematic process used by scientists to investigate questions and solve problems. It involves steps such as making observations, forming hypotheses, conducting experiments, analyzing data, and drawing conclusions. This method ensures that findings are based on evidence and can be tested and verified.

Question 2: Differentiate between a pure substance and a mixture.

Answer: A *pure substance* has a fixed composition and consistent properties throughout, such as elements and compounds. A *mixture* consists of two or more substances that are physically combined and can vary in composition, such as salad or air. Mixtures can be separated by physical means, whereas pure substances require chemical processes for separation.

Question 3: What are SI units, and why are they important?

Answer: SI units (International System of Units) are a standardized system of measurement used worldwide in science and industry. They include units like meter (m) for length, kilogram (kg) for mass, and second (s) for time. Using SI units ensures consistency and accuracy in measurements and communication across scientific communities.

Question 4: Describe the properties of solids, liquids, and gases.

Answer:

1. **Solids:** Have a definite shape and volume, with particles tightly packed in an orderly arrangement. They are incompressible and have fixed positions.
2. **Liquids:** Have a definite volume but take the shape of their container. Particles are close but can move past each other, allowing liquids to flow.
3. **Gases:** Have neither a fixed shape nor volume. Particles are far apart and move freely, filling their container entirely. Gases are compressible.

Question 5: How are atoms and molecules related?

Answer: An *atom* is the smallest unit of an element that retains its properties. A *molecule* is a group of two or more atoms bonded together. Molecules can consist of atoms of the same element (like O_2) or different elements (like H_2O).

Advanced Tips for Mastering Assessment Questions

To further enhance your ability to find correct answers, consider the following advanced tips:

1. **Create Summary Sheets:** Summarize each topic in your own words for quick review.
2. **Utilize Visual Aids:** Use diagrams, charts, and models to better understand atomic structures and properties of matter.
3. **Engage in Group Study:** Explaining concepts to peers can reinforce your understanding and reveal gaps in knowledge.
4. **Seek Clarification:** Don't hesitate to ask teachers or tutors for explanations of concepts you find difficult.
5. **Practice with Past Assessments:** Use previous

tests or practice quizzes provided by your textbook or online resources to familiarize yourself with question formats and difficulty levels.

Additional Resources for Practice and Review

Utilizing supplementary materials can boost your confidence and comprehension:
