1. **Personal Area Network (PAN):** Short-range networks connecting personal devices like smartphones, tablets, and wearables.
2. **Local Area Network (LAN):** A network within a small geographic area such as an office, school, or home.
3. **Wide Area Network (WAN):** A larger network that spans broad areas, including the internet itself.
4. **Metropolitan Area Network (MAN):** Connects multiple LANs within a city or metropolitan region.

Key Networking Devices

Understanding the essential hardware involved in networking:

1. **Router:** Connects multiple networks and directs data traffic between them.
2. **Switch:** Connects devices within a LAN, facilitating communication between them.
3. **Modem:** Modulates and demodulates signals to enable internet access over telephone or cable lines.
