need—businesses, governments, and institutions.

They are crucial for economic growth, allowing entities to raise long-term funds to finance expansion, infrastructure, and innovation. What Are Capital

Markets? At their core, capital markets facilitate the raising of long-term funds through the issuance and trading of securities such as stocks and bonds. They are distinguished from money markets, which deal with short-term debt instruments. Main functions of capital markets include:

- Mobilization of Savings:

Converting household savings into productive

investments.

- Price Discovery: Determining the value of securities based on supply and demand.

- Liquidity Provision: Offering investors the ability to buy or sell securities with ease.

- Risk Management: Allowing diversification and hedging through various financial instruments.

Types of Capital Markets

Capital markets are broadly classified into two categories:

1. Primary Market The primary market is where new securities are issued directly by

companies or governments to investors. This process is known as an initial public offering (IPO) or bond issuance. Key features:

- New securities are created.

- Funds raised go directly to the issuer.

- Regulatory

oversight is critical to ensure transparency and investor protection. - Examples include IPOs, rights issues, and private placements. 2. Secondary Market Once securities are issued, they are traded among investors in the secondary market. This market provides liquidity and valuation for existing securities. Key features: - No direct involvement of the issuing entity. - Prices fluctuate based on market conditions. - Facilitated by stock exchanges, over-the-counter (OTC) markets, etc. Participants in Capital Markets - Issuers: Companies, governments, municipal bodies. - Investors: Retail investors, institutional investors, mutual funds, foreign investors. - Intermediaries: Stock exchanges, brokers, merchant bankers, underwriters, depositories. - Regulators: Securities and Exchange Board of India (SEBI), Securities and Exchange Commission (SEC) in the US, etc.

Securities Laws: The Regulatory Framework

Securities laws are the legal provisions that regulate the issuance, trading, and management of securities. They aim to protect investors, ensure fair play, prevent fraud, and promote transparency. Objectives

of Securities Laws - Investor Protection: Ensuring that investors receive accurate information and are shielded from malpractices. - Market Integrity: Maintaining a fair and transparent marketplace. - Efficient Capital Formation: Facilitating smooth and reliable access to capital. - Prevention of Fraud and Malpractices: Deterring insider trading, price manipulation, and misrepresentation. Key Principles Underpinning Securities Laws - Transparency: Full disclosure of material information. - Fairness: Equal treatment of all investors. - Accountability: Responsibility of issuers and intermediaries. - Integrity: Prevention of fraudulent and manipulative practices.

Major Securities Laws and Regulations

Various legislations govern securities markets across different jurisdictions. Here, we focus particularly on the Indian context, highlighting the Securities and Exchange Board of India (SEBI) Act, 1992, and related regulations. Similar principles apply globally, with regulators like the SEC in the US, FCA in the UK, and others playing analogous roles. The Securities and Exchange Board of India (SEBI) Act,

1992 SEBI was established as the primary regulatory authority for securities markets in India. Its mandate includes protecting investor interests, developing the securities market, and regulating its functioning.

Main provisions include: - Regulation of stock exchanges, brokers, merchant bankers, and other intermediaries. - Oversight of public issues and shareholder disclosures. - Prevention of fraudulent and unfair trade practices. - Regulation of insider trading and takeovers. - Enforcing transparency and fair pricing in securities dealings. and transfer of securities. - Foreign Exchange Management Act (FEMA): Governs foreign investments and cross-border securities transactions. - Securities Contracts (Regulation) Act, 1956: Regulates stock exchanges and trading practices.

dividend policies, and grievance redressal.

Challenges and Ongoing Reforms Despite extensive regulation, markets face issues like insider trading, price manipulation, and lack of transparency in some cases. Regulators continuously adapt by introducing new rules, leveraging technology (like Electronic Trading Platforms), and strengthening enforcement mechanisms.
