Step 4: Prepare the New Relay for Installation

- Inspect the new relay for any damage. - Clean the contact points if necessary. - Compare the new relay with the old one to ensure compatibility.

Step 5: Connect the New Relay

- Attach the wires to the corresponding terminals on the new relay, following the photo or wiring diagram. - Ensure all connections are secure and free of corrosion or debris.

Step 6: Mount the New Relay

- Secure the relay in its designated position on the control board or mounting bracket. - Ensure it is firmly attached to prevent vibrations or disconnections.

Step 7: Reassemble and Test

- Replace the furnace access panel and secure it properly. - Turn the power back on at the breaker. - Set your thermostat to call for heat and observe the blower operation. - Use a multimeter to verify that voltage is reaching the relay and the blower motor.

Additional Tips for a Successful Installation

1. **Use the Correct Replacement Part:** Always verify the relay model number and specifications match your furnace's requirements.
2. **Label Wiring Connections:** When disconnecting wires, label them with masking tape and a marker for easier reassembly.
