1. Teaching Text Structure and Signal Words

Rationale: Recognizing the typical structure and linking words of recount texts aids comprehension.

Implementation:

1. Teach students to identify the orientation (who, what, where, when).
2. Highlight sequence markers such as “first,” “then,” “after that,” “finally.”
3. Use graphic organizers like timelines or flowcharts

to map the sequence.

Lists of common signal words:

These adjustments reduce eye strain and accommodate individual preferences or visual needs. Night mode, sepia backgrounds, and brightness controls make long reading sessions more comfortable and sustainable.

Digital copies also reduce physical storage requirements. Instead of shelves filled with books, eBooks are stored digitally, freeing up space at home

or in the office. This minimal footprint is particularly beneficial for users with limited space or those who prefer a clutter-free environment.

Unlike handwritten notes, digital annotations are searchable and editable, enhancing long-term usability.

Many eBook platforms allow users to export notes and highlights. Exported annotations can be used for revision, research, presentations, or collaborative study. This feature is particularly useful for students and professionals who rely on organized summaries and references.

Color-coded highlights add another layer of organization. Different colors can represent themes, importance levels, or types of information. For example, one color may be used for definitions, another for examples, and another for questions. This
