These exercises are suitable for learners at different levels, from beginners to advanced students, and focus on forming, identifying, and correctly using relative clauses in context.

What Are Relative Clauses?

A relative clause is a type of subordinate clause that provides additional information about a noun or pronoun in a sentence. It usually begins with a relative pronoun such as who, whom, whose, which, that, or a relative adverb like where, when, why. Example: - The book that I borrowed from the library is fascinating. - The woman who lives next door is a doctor. Relative clauses can be defining (essential information) or non-defining (additional, non-essential information). Understanding the difference is crucial for correct punctuation and meaning.

Types of Relative Clauses

Defining Relative Clauses

These provide essential information about the noun they modify. They are not set off by commas. Example: The students who study hard will pass the exam.

Non-Defining Relative Clauses

These add extra information that can be omitted without changing the overall meaning. They are set off by commas. Example: My brother, who lives in Canada, is visiting us next month.
