Mohr-Coulomb Theory

A model describing shear strength as a function of normal stress and cohesion: $\tau = c + \sigma' \tan \phi$ where τ is shear strength, c is cohesion, σ' is effective normal stress, and ϕ is the angle of internal friction.

Consolidation Theory

Explains how soils settle over time under load due to expulsion of water, critical for designing foundations and predicting settlement.

Flow of Water in Soils

Darcy's Law governs water movement, essential for understanding drainage and stability.
