compréhension de la nature humaine dans des environnements contrôlés. Les points clés incluent : - La mise en place d'une simulation de prison dans un sous-sol de l'université de Stanford. - La sélection aléatoire des participants, assignés au rôle de gardiens ou de prisonniers. - La rapide dégradation des comportements, illustrant comment l'environnement influence la moralité et le comportement.

Les implications éthiques

L'expérience a également soulevé des questions éthiques importantes concernant la recherche en psychologie, menant à l'élaboration de normes strictes pour la protection des participants. Zimbardo lui-même a insisté sur la nécessité de respecter la dignité humaine dans la recherche.
