A parliamentary system combines executive and legislative powers in a single branch, while a presidential system separates them. C. In a parliamentary system, the head of government is usually the prime minister, while in a presidential system, the president is both head of state and government. D. Presidential systems always have a bicameral legislature, whereas parliamentary systems are unicameral. Analysis: - The correct answer is C. A key distinction lies in the role and election of the executive. - Knowing the characteristics of each system helps eliminate incorrect options: - A is false because in parliamentary systems, the executive (prime minister) is usually chosen by the legislature, not directly elected by the people for the executive position. - B is partially true but oversimplifies and can be misleading. - D is false; both systems can have unicameral or bicameral legislatures.
